U.S. AIR FORCE

CRIMINAL INFORMATION REPORT (CIR) 02-53

FROM: AFOSI HQ AFOSI/XOGB

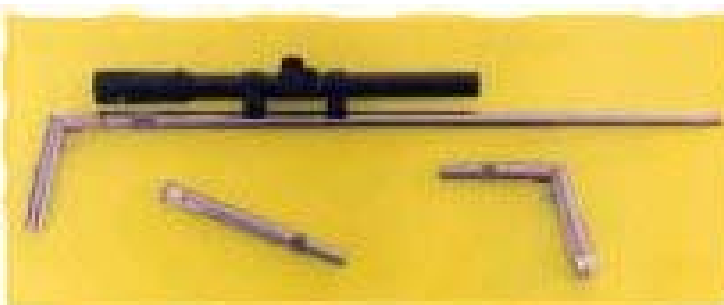

DATE OF REPORT: 21 October 2002

TO: All AFOSI Regions, Squadrons, and Operating Locations (Cat III)

SUBJECT: Officer Safety Bulletin - Stinger Pen Guns.

SOURCES: Security Specialist Ivan S. Wilson, Defense Reutilization & Marketing Service Office of Command Security (DRMS-DDS); and Michigan State Police Intelligence Division.

SUMMARY: This Criminal Information Report (CIR) is being issued to disseminate an awareness brief for law enforcement personnel regarding easily concealed firearms manufactured by Stinger Manufacturing Corporation (SMC), 562 East Spruce Street, P. O. Box #37, Sault Sainte Marie, MI 49783-0037. The 5.6" stainless steel guns are .22 caliber, single shot, and weigh 5 ounces when empty. The cost is \$275.00 for the stainless version and \$399.00 for the Limited Edition 24K Gold plate version. Below right is the 18" sniper barrel that the company claims is "all new" and "coming soon". SMC representatives claim that with the new Concealed Carry Weapons (CCW) law in Michigan, the demand for easily concealed firearms is "booming". More photographs and specification on these firearms can be seen at the following SMC web site: <http://www.stingerpengun.com>

DISTRIBUTION RESTRICTIONS: LAW ENFORCEMENT USE ONLY: Disseminate this information to other Military/DoD/Government Criminal Investigative Organizations (NCIS, USACIDC), Security Forces, and local law enforcement.

COMMENTS: This CIR was published as an Officer Safety Bulletin (OSB). OSBs are part of a continuing effort to enhance agent safety and reduce the threat of injury while carrying out law enforcement duties. All law enforcement officers especially those who conduct searches and apprehensions/arrests should be aware of concealed weapons.

Officer Safety Bulletin - Stinger Pen Guns

Undercover Guns
for Law Enforcement Officers

The Stinger Pen Pistol was conceived as an ultra-concealable back-up gun. It is effective at close range and can be concealed anywhere. It is absolutely safe, and cannot be fired in the pen position. Just pull and bend 90° and its ready to fire. A nice companion; on or off duty.

Available in
22LR or
25/32/380 ACP

The FM Revolver (folding mini-frame) is the smallest, high caliber pocket pistol on the market. Throw away the old snubnose. When folded, the FM will fit in your pocket or small utility case on your belt, which we provide. Opened, the gun will fit your hand like a .45. It is double action and fires from the bottom of the cylinder for no upward recoil, and a better second shot.

I think you are going to like this gun!
